PROJECTS

Portfolio Website (Front-End)

Personal Project ([Website](#)) - ([GitHub](#))

- Taught myself HTML/CSS/JavaScript in order to complete the front end development of the website
- Deployed site with a custom domain through GitHub

Python Scripting

- Created a Python script using Selenium and Chrome webdriver that automatically fills out COVID form with my information

Built My Personal Computer (Hardware)

- Taught myself the details of each component of a computer (CPU,GPU,PSU,RAM,Storage)
- Had a budget in mind and used it to specifically choose which parts to use
